SUMMARY

Software Developer with 1.6 years of experience delivering scalable Flutter applications, including contributions to a high-traffic fintech product. Focused on scalable architecture, high performance, smooth user experience, and maintainable code.

EXPERIENCE

Flutter Developer - MT **Jan 2025 – Jul 2025**
5paisa Capital Ltd, Mumbai – Full-time

- Revamped the Mutual Fund order flow by enhancing SIP and One-Time investment screens, improving the payment confirmation screen with UPI Intent support, and implementing last-used payment method logic to reduce transaction friction for repeat users.
- Implemented the Position Grouping feature in the stocks positions screen, enabling users to group positions by underlying or expiry for improved portfolio tracking.
- Utilized Firebase Remote Config for dynamic UI management and CleverTap for analytics tracking; standardized app typography and resolved UI inconsistencies across screens.
- Developed features using Bloc state management, repository pattern, and feature-based modular architecture in a production Flutter app.

Flutter Developer **Oct 2023 – Oct 2024**
T7E Aftermarket Connect Pvt Ltd, Mumbai – Full-time

- Built and maintained multiple mobile applications published on the Play Store and App Store, with individual apps reaching 50k–100k+ downloads.
- Integrated third-party services including Google Maps, OCR, and Firebase for push notifications and user analytics.
- Implemented secure API communication using encryption protocols to protect sensitive data.
- Translated Figma designs into responsive, pixel-perfect Flutter UIs optimized for multiple screen sizes.
- Collaborated using Git, Bitbucket, and Jira for version control, code reviews, and agile task management.

EDUCATION

SIES College of Arts, Science & Commerce **Aug 2020 – Jun 2023**
Bachelor of Science, Computer Science
CGPA: 9.3/10

TECHNICAL SKILLS

- Flutter & Dart
